Why aluminum sand castings?

- ◆ Light weight
- ◆ Easy to handle and store
- ◆ Easier to machine
- ◆ Good mechanical properties
- ◆ Good electrical conductivity properties
- ◆ Good heat dissipation
- ◆ Weldable
- ◆ Polishable
- ◆ Good corrosion resistance
- ◆ Good strength at high temperature
- ◆ Can be electroplated
- ◆ Can be anodized
- ◆ Can be powder coated

The best kept secret in the job shop industry!

REULAND

Aluminum Foundry

...That's right!

You've seen our castings in every Reuland electric motor in the field, but that's just where we got started....

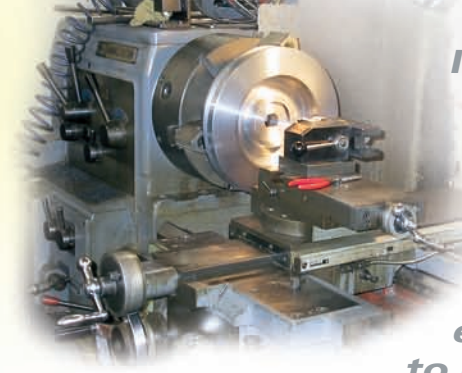

At our City of Industry plant, Reuland has a full service aluminum green sand foundry where we produce castings for a variety of industries and applications....

We're not just about motors here!

Established in 1947, our foundry is located in a 16,600 sq ft casting facility including:

- ◆ Complete pattern shop for design, wood patterns, matchplates and tooling maintenance
- ◆ Overhead sand system delivering consistent sand
- ◆ Melting in electric resistance, gas fired reverb and crucible furnaces
- ◆ Coreroom featuring CO2 and shell core production
- ◆ Green sand molding in squeezer, rotolift and cope and drag lines
- ◆ Comprehensive cleaning and finishing rooms

In addition to the foundry, our 51,000 sq ft main plant enables us to offer even more value added services:

- ◆ A full service, state-of-the-art, CNC Machine Shop
- ◆ Engineering
- ◆ CAD/CAM
- ◆ Rapid Prototyping
- ◆ CMM Inspection
- ◆ Welding
