

General Machinist

Will be responsible for setting up and operating a variety of machines such as lathes, mills, cylindrical grinders, and broaching machines to make shafts, components, bores, and threads.

Will interpret blue prints to determine the sequence of operations, number of cuts required, and method of set-up.

Must be able to perform inspections by using precision measuring and gauging instruments.

Will apply concepts of basic math.

What makes you a great machinist? Tell us about it. Send your resume by fax or e-mail to 440-551-2993/hr-mi@reuland.com. Or apply in person at 4500 E. Grand River, Howell MI
8am - 4pm M-F
