

Manufacturing Engineer

We are looking for a Manufacturing Engineer to help us implement manufacturing processes that result in high-quality products.

The role of the Manufacturing Engineer is to evaluate existing equipment and processes and configure new and innovative manufacturing systems to reduce cost, improve sustainability, and develop best practices within the production process. The main focus of this position is on maintaining reliable and safe manufacturing systems while improving our production rates, efficiencies, yields, costs, and changeovers. You will also be involved in providing production support in areas of safety, quality, engineering problems and cost reductions, etc.

We offer an attractive benefits package:

Medical, Dental, Vision, FSA, Life + Additional Life
Long Term Disability & Short-Term Disability, and 401 k
